

Introducing the **NEW**

LM100

The LM100 (LogisticsMover) is specifically designed to move carts and cages where space, people and merchandise work closely together. Operators pushing and pulling loads in busy, fast and congested locations need smart machines to deliver safety and efficiency.

Moves
2,205 lbs

Key Features

Safety

- Anti-crush button and horn
- Secure coupling for load security
- Machine stop when controls disengaged, including on slopes

Performance

- Dual high-powered motors for equal power distribution
- 180° steering angle for precision movement
- Move loads up to 2,205 lbs

Quality

- Heavy-duty, maintenance-free battery
- Puncture-proof non-marking tires
- Tubular steel chassis and IP44 rating

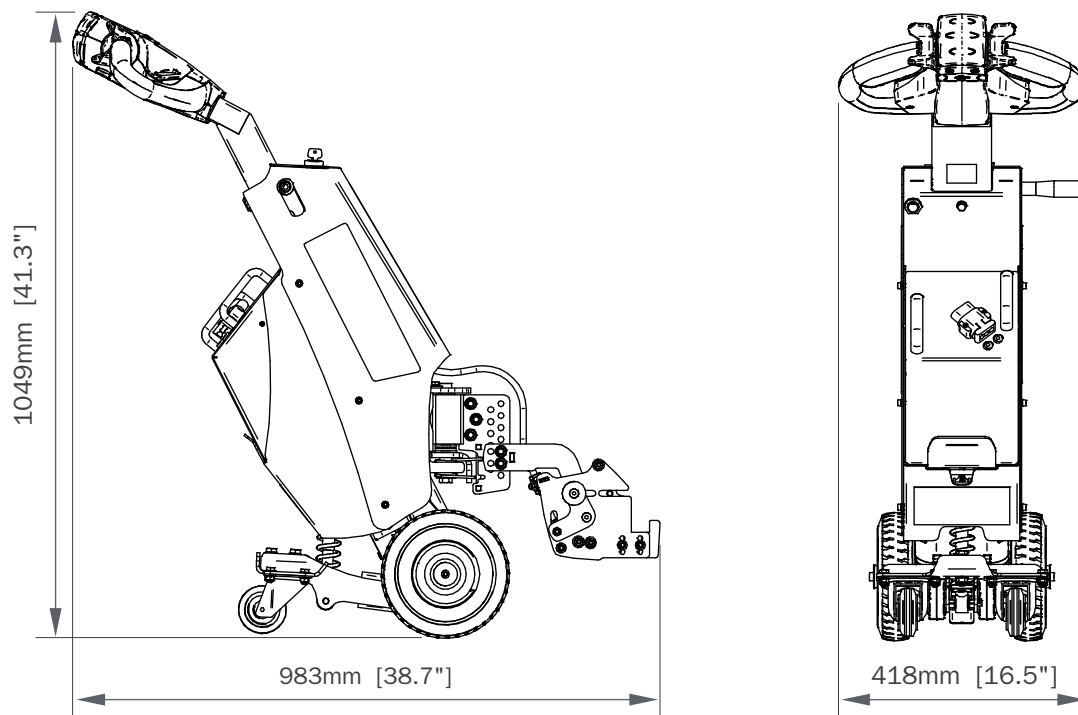

Power

- Interchangeable battery for 24/7 operation with fast charging
- Power display for real-time charge status
- Auto-switch off on full-charge to maximize battery life

Connection

- Versatile multi-purpose coupling
- Custom coupling available
- Simple connection to items like carts and cages

LM100 Technical specification

LM100 Product data

Machine	Maximum Load	2,205 lbs
	Maximum Push Force (N)	981
	Maximum Pull Force (N)	981
	Connection	Cable
	Maximum Slope	30°
